## EDUCATION

### Mechanical Engineering—(2019–2023)

INSTITUTE - Dr. Vithalrao vikhe patil college of engineering (SPPU)

Cgpa- 7.61

## PROJECTS

### E-COMMERCE WEB APPLICATION

OCT-2023 TO NOV-2023

I developed e-commerce web application using Java and Spring Boot for the backend. I set up the database using MySQL and created the part you see and interact with using Angular and Bootstrap. The webapp lets users sign in with a secure system using JWT. You can check out products, add them to your cart, and place orders. There are also special dashboards for admins and sellers to manage things.

### EMPLOYEE MANAGEMENT SYSTEM

SEP-2023 TO OCT-2023

I have completed a project dedicated to managing employee information with a specific focus on the backend. The project leverages Java and Spring Boot, along with a MySQL database. The system adeptly stores and processes employee data. With this backend, managers can perform tasks such as adding new employees, updating information, and retrieving details as needed.

PHOTOGRAPHY WEBSITE – I created a Photography Website with WordPress, enabling seamless image downloads, blog engagement, and secure login. Integrated Botpress for efficient chatbot assistance, enhancing user experience.

## SKILLS

1. Backend Technologies  
(Java Programming  
Spring Boot, Hibernate, JDBC)
2. Frontend Technologies  
(React, Angular , HTML, CSS  
and JavaScript )
3. Cross platform app  
development ( Flutter and  
dart)
4. SQL
5. Figma
6. Version Control (Github,  
Git)
7. Wordpress

## TOOLS

Eclipse  
Visual Studio Code (VS Code)  
Android studio  
IntelliJ IDEA

## SOFT SKILLS

Teamwork  
Quick Learner  
Problem-Solving
